WHAT IS IT?

The core housing need chart measures the percentage of households that either:
i) costs more than 30% of their income.
ii) requires major repairs
iii) is not big enough for their family size

WHY IT MATTERS?

Suitable and affordable housing is a crucial basic need and if citizens are unable to meet the three standards, it places them in a bad position regarding their resources and health.

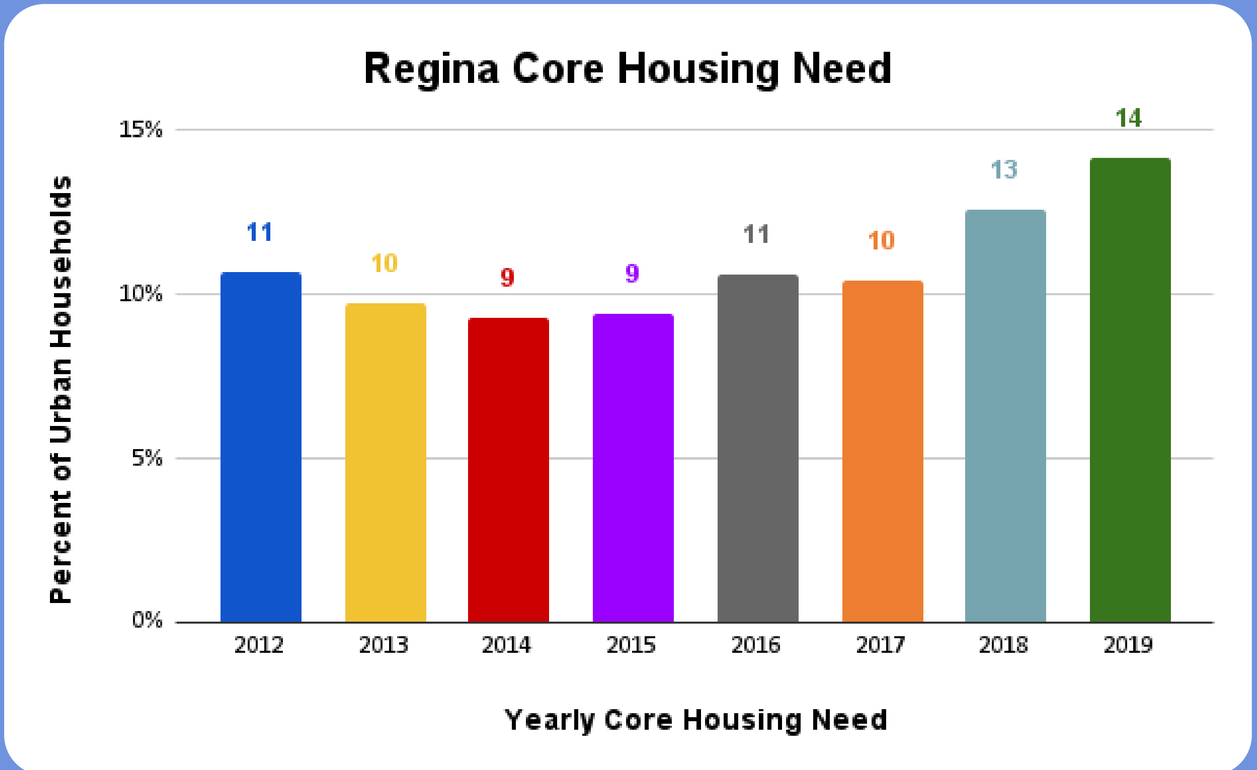
LEARN MORE



CORE HOUSING NEED

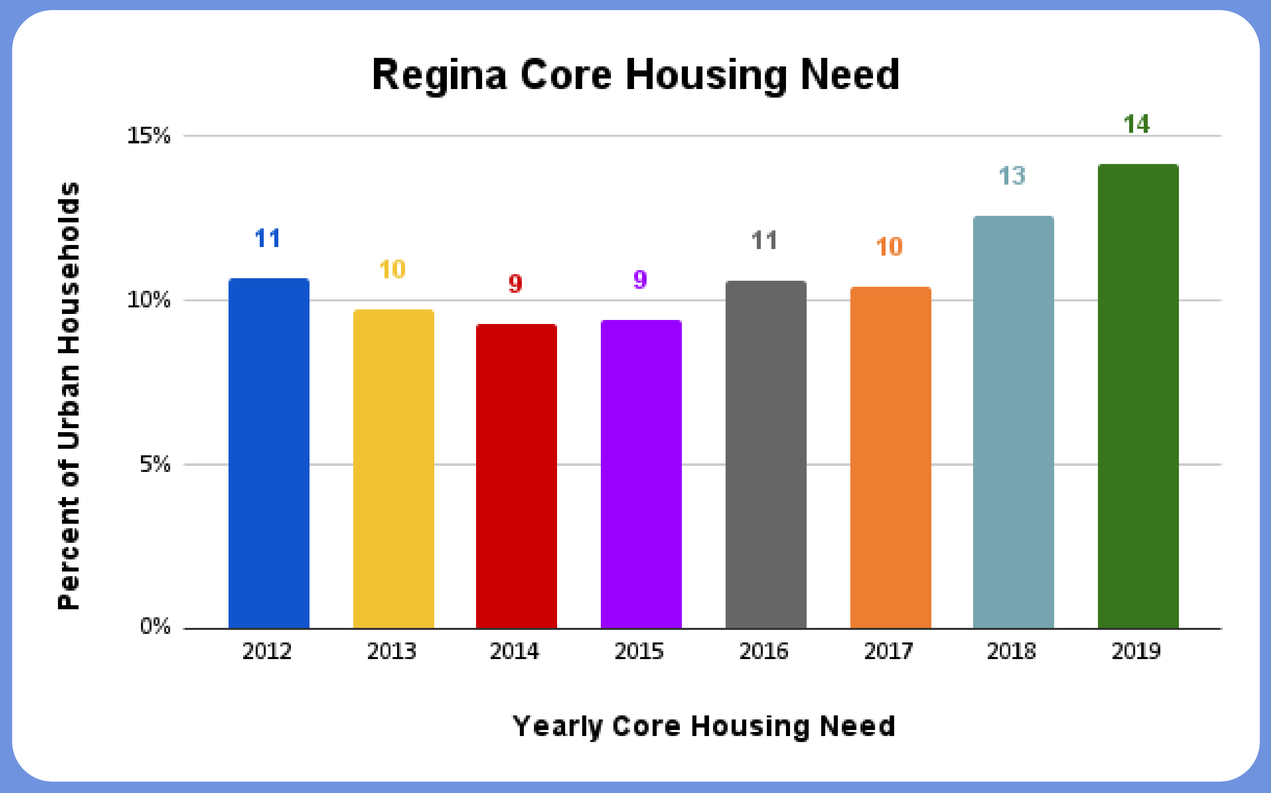
WHAT IS IT?

The core housing need chart measures the percentage of households that either:
i) costs more than 30% of their income.
ii) requires major repairs
iii) is not big enough for their family size

WHY IT MATTERS?

Suitable and affordable housing is a crucial basic need and if citizens are unable to meet the three standards, it places them in a bad position regarding their resources and health. Since housing costs often account for significant portions of the household budgets, these costs can make a difference in living comfortably.

RELEVANT SDGS



MEASUREMENTS AND LIMITATIONS

The core housing need indicator reports the number of households that meet the above criteria in the City of Regina. As affordability is used to determine core housing need, it is recognized as the maximum percent of the household income spent on shelter. Even the Canadian Mortgage and Housing Corporation (CHMC) defines a household as being in core housing need if it is as follows: “unable to afford shelter that meets adequacy, suitability, and affordability norms.”

A household is considered adequate if it is not it need of major repairs. Moreover, suitability refers to fitting the family size, where the number of rooms and space are sufficient for the makeup of households. Based on National Occupancy Standards, each cohabiting adult couple are expected to have one bedroom, apart from household members 18 years of age or older, same-sex pair of children under the age of 18, and each additional child in the family. Notably, a household is affordable if it costs less than 30 percent of residents’ before tax income, which includes rent, mortgage, and utility payments.

Note: This indicator does not include homeless individuals.

RESOURCES & REFERENCES

Canada Mortgage & Housing Corporation’s Housing in Canada Online (CMHC) collects this data for each census year. More details can be found in the website.

WHAT IS IT?

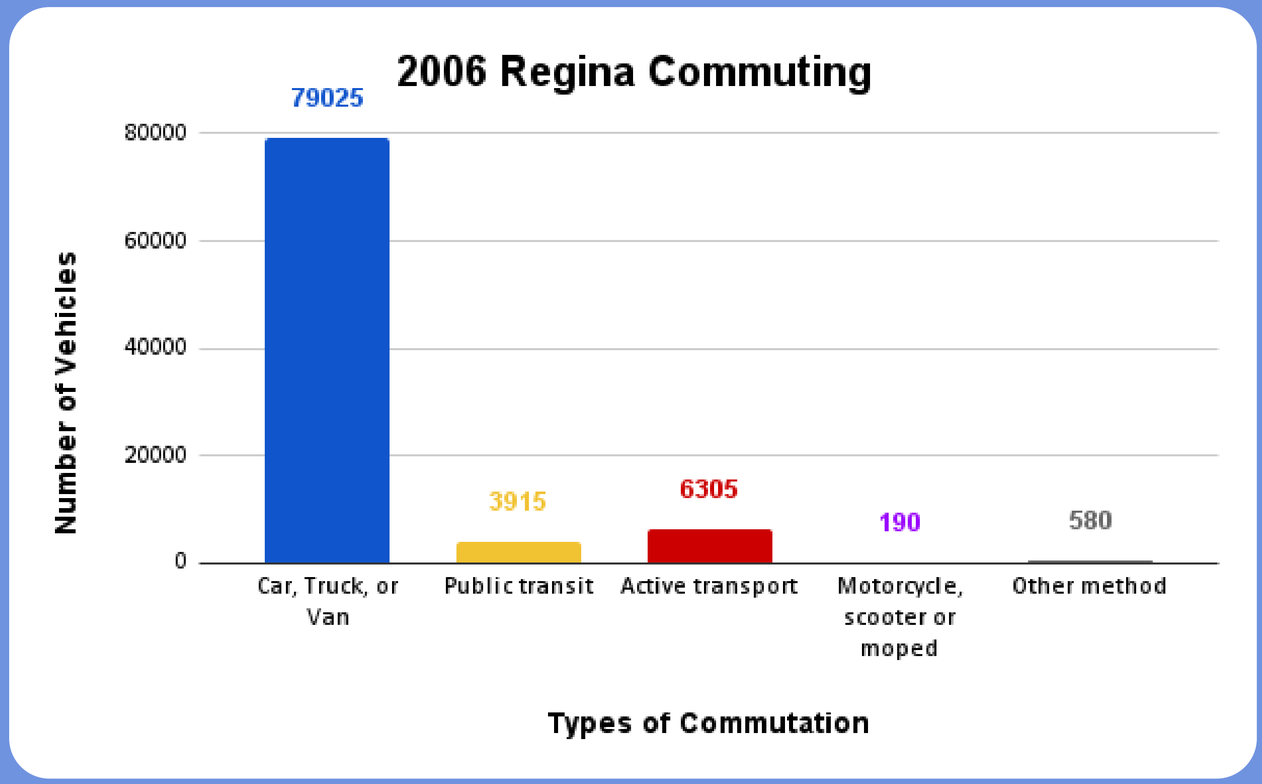
The commuting chart reveals the most utilized vehicles when transporting around Regina. Usually, people travel using public transit, active transit (biking or walking), or an automobile (car, truck, van). Here, individuals are riding as a passenger or as the driver to go to a desired location.

WHY IT MATTERS?

Transportation is significant in our daily lives as it is how we travel to places in the city, whether we are going to work, school and social gatherings. Commuting patterns is affecting human and environmental well-being.

When different modes of transportation are utilized, like public and active transit, this can ultimately decrease dependency on gas emission automobiles. Hence, convenient and well designed access to automobile have a variety of benefits for the environment and society.

Select Year Range



RELEVANT SDGS

MEASUREMENTS AND LIMITATIONS

The commuting patterns indicator reveals the number of vehicles used whether it is public transit, active transit, and automobiles. Mostly, it portrays citizens that are 15 years old and over who may be a part of the work force or obtain more responsibilities.

HOWEVER, it is important to note that the community patterns indicator does not take into account individual variation or distance. For instance, if one were to drive 70% of the time and bike to work 30%, the chart will record the highest percentage. Also, if a person were to drive 20km to work compared to another who drove 12km to work, it is not differentiated.

RESOURCES & REFERENCES

Statistics Canada collects this data for each census year. More details can be found in the website.

We acknowledge that we are on Treaty 4 territory, the traditional lands of the Cree, Saulteaux, Nakota, Dakota, and Lakota peoples, as well as the homeland of the Métis Nation. We recognize the enduring presence of Indigenous peoples on this land and commit to honouring their past, present, and future contributions to our community.

WHAT IS R-INSPIRED?

Welcome to R-Inspired, your gateway to sustainable development in Regina, Canada! Our website is dedicated to providing accessible and informative data on the Sustainable Development Goals (SDGs) set by the United Nations, tailored specifically to our city. Explore our interactive maps, charts, and resources to learn about local initiatives, track progress, and discover how you can contribute to a more sustainable future for Regina.
Join us in making a positive impact on our community and the world!

WHAT IS R-INSPIRED'S PURPOSE?

At R-Inspired, our mission is to empower individuals, organizations, and policymakers in Regina, Canada, to contribute towards sustainable development. Through data-driven insights and community engagement, we aim to raise awareness, inspire action, and drive positive change towards the Sustainable Development Goals (SDGs) set by the United Nations. By providing accessible and relevant information, we strive to foster a culture of sustainability, where every citizen can make informed decisions that benefit our city, our environment, and our future generations.
