Hashir's Low-Fidelity Prototype

- ★ **Affordance** :In my low-fidelity prototype, I've included clickable buttons paired with icons. These icons serve as visual cues, effectively guiding users toward specific actions. For example, in my search button I have a search icon which represents a search button for people. Another one is the arrow button which will signify to go right or to go left when viewing the SDG information.
- ★ **Gestalts Principles (Proximity)**: In my low-fidelity prototype, I've used the principle of proximity from Gestalt principles. For instance, on my SDG page, I've arranged the SDGs in a pinwheel format. Their close proximity indicates that they belong to the same category, helping users perceive their relatedness. Additionally, on the homepage, the six closely grouped boxes reinforce the idea that they share a common purpose.
- ★ **Gestalt Principle (Continuity)**: In my low-fidelity prototype, I incorporated the continuity principle, recognizing that people naturally follow smooth and continuous visual paths. Specifically, on my SDG page, clicking an SDG in the pinwheel reveals a pop-up tab with seamless lines guiding users to the next arrow, allowing them to explore the next SDG.
